RECYCLO

CORE STRIPPER MACHINE

A new machine with small dimensions, very easy to use that allows to separate the material from the cores from the end rolls.

In this way the wrapped material (plastic, paper or flexible materials) can be easily recycled and enhanced, while the spindle can be reused and disposed of separately.

The machine makes recycling and reuse easy with a view to a concrete circular economy.

Una macchina dalle dimensioni ridotte, facilissima da usare che permette di separare nei fine bobina il materiale dal mandrino.

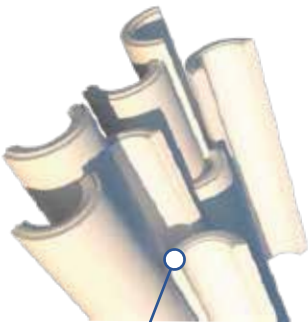

In questo modo il materiale avvolto (plastica, carta o materiali flessibili) può essere facilmente riciclato e valorizzato, mentre il mandrino può essere riutilizzato e smaltito separatamente.

La macchina rende facile il riciclo e riutilizzo nell'ottica di una economia circolare concreta.
